

A Donaldson Company

A WORLD LEADER IN FUME **EXTRACTION TECHNOLOGY**

DustPRO 1500 iQ

High-end industrial particle and dust extractor.

The biggest in our DustPRO range, the DustPRO 1500 iQ combines a 100-litre pre-filter bag and high-efficiency HEPA with high airflows and pressure. This combination makes it ideal for heavy-duty applications.

One of the main problems with other dust extractors relates to the type of blower used. Most have brushed motors which are noisy in operation and frequently burn out. The blower used in the DustPRO 1500 iQ is brushless and designed for long continuous running before servicing.

More information about the Intelligent Operating System (iQ).

Approvals: REACH and RoHS. See individual product technical data for specific accreditations

Onboard compressor

Optional

Technical specifications

- 1. iQ display
- 5. Castors
- 9. Motor cooling inlet
- 2. On / off switch
- 6. Door hinge
- 10. Door latch
- 3. Power cable
- 7. Hose inlet connection 125mm
- 11. Motor cooling outlet
- 4. Signal / interface cable
- 8. Exhaust outlet
- 12. Standby button

| Technical data | |
|----------------------|---|
| | EU |
| Dimensions (HxWxD) | 1205 x 615 x 790mm (47.44 x 24.21 x 31.10") |
| Cabinet construction | Powder coated mild steel |
| Airflow / pressure | 1250m3h/735 CFM - 100mbar |
| Electrical data | 230v Single-phase 1~ 50/60Hz Full load current: 21.6 amps / 3.3kw |
| | 415v Three-phase 3~ 50/60Hz Full load per phase: 8.5amps Neutral 14.5amps |
| Noise level | < 68dBA (at typical operating speed) |
| Weight | 102kgs / 225lbs |
| Approvals | UKCA and CE / cUL / UL * |

| Bag filter specifications | | |
|---------------------------|-------------------------|--|
| Volume area | 100ltrs approx | |
| Filter media | Polyester | |
| Filter media construction | 8 pocket bag filter | |
| Surface media area | 2.5m² approx (26.9 ft²) | |
| Filter efficiency | 95% @ 0.9 microns | |

| HEPA filter specifications | |
|----------------------------|--|
| HEPA filter media | Borosilicate |
| HEPA media construction | Maxi pleat construction with glue bead spacers |
| Surface media area | 7.5m² approx (80.7 ft²) |
| Filter efficiency | 99.997% @ 0.3 microns |

^{*} Tested to UL and cUL standards, but testing may be provided by alternate nationally recognised test laboratories. Certain product configurations may affect the UL certification. Please speak to your sales representative.

Datasheet correct at time of publishing.

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOCs, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.

Important Notice: Many factors beyond the control of BOFA can affect the use and performance of BOFA products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
