

A Donaldson Company

A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

PrintPRO Universal

Last Updated on 02.02.2022

Fume extraction system for the print and print finishing industries.

BOFA's pioneering extractor, the PrintPRO Universal is designed exclusively for the print and print finishing industries. The PrintPRO Universal's unique features enable it to filter a wide range of solvents generated within these environments, including MEK, ketones and vapours from UV applications.

The PrintPRO Universal is easily adapted to a huge range of environments, including wide format printers, inkjet coding printers (CIJ) (both solvent and UV) and numerous mailroom applications such as UV coating, hot melt glue binding and mailwrap polywrapping.

Technology

HEPA filter

Advanced carbon filter (ACF) technology

Multi voltage sensing (MVS) unit

ProTECT service plan

SureCHECK quality standard

Key features of the PrintPRO Universal

VOC gas sensor (Volatile Organic Compound)

Standard

Extended life carbon for low cost of ownership

Standard

Low noise level

Standard

Compact size enables extraction unit to be positioned within

the printer footprint

Standard

Powder coated for durability

Standard

Filter change indicator

Standard

Filter change signal

Optional

Auto sensing voltage (100-240v) for global use

Standard

Specially treated carbon for safe containment of print fumes

Standard

Small footprint

Standard

Castors for portability

Standard

Digital speed control

Standard

24V remote stop / start interface via printing machine

Optional

Quiet mode silencer box for office environments, with option

to vent outside the building

Optional

Technical specification

- 1. Digital speed control
- 5. Lid fastening latches
- 9 Castors

- 2. On / off switch
- 6. Handles
- **10.** Optional silencer box with grille
- 3. Filter condition display
- 7. Hose inlet connections 32mm / 38mm / 100mm
- **11.** Optional silencer box with spigot
- 4. IEC power cable inlet
- 8. Exhaust outlet

Airflow through filters

HEPA filter

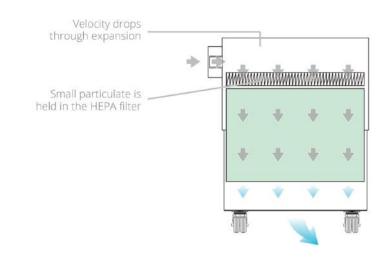

Chemical filter

Contaminated air

Clean air

| Technical data | | |

^{*} Tested to UL and cUL standards, but testing may be provided by alternate nationally recognised test laboratories. Certain product configurations may affect the UL certification. Please speak to your sales representative.

Datasheet correct at time of publishing.

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOCs, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.

Important Notice: Many factors beyond the control of BOFA can affect the use and performance of BOFA products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.

Think before you print! Please consider the environment before printing this document.
