

# PRINT YOUR OWN CONNECTORS

## 3D PrintPRO 3 / 3D PrintPRO 4

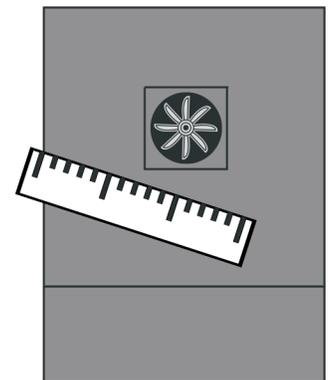

### INSTRUCTION MANUAL

- 1 Identify the location of the exhaust fan on the 3D printer.

- 2 Identify whether the fan can be removed via screws or not.

- 3 Measure the outer dimensions of the fan or fan housing.

- 4 Choose the .STEP file with dimensions closest to what was measured.

5

Print .STEP file with any material of your choice, we recommend standard PLA.

6

Ensure you have the corresponding hose kit for the extractor of choice.

7

Clean up your finished print and attach to your 3D Printer to your BOFA system.
